

What is Dow COP?

In 1989, the Dow College Opportunity Program was founded to help break the cycle of poverty and lack of higher education so prevalent in rural Midland County. Making its home at the West Midland Family Center, the Dow College Opportunity Program has improved the lives of our students in the program who are deserving, hard working, and from families who need many types of assistance to send their children to college.

Students begin the program when they enter high school. The next four years are filled with activities designed to help prepare students for college and their lives after. The students volunteer hundreds of hours to the community and to helping those in need. We support their academic pursuits through educational workshops and college visits. Cultural excursions broaden their social experiences to build confidence and poise, and help them learn more about the world. The students also engage in many activities throughout the year that are designed to foster teamwork, leadership, and good communication skills. The program director, Haley Northup, also serves as a mentor, sharing in their experiences and goals. The program assistant, Kelsey, is another mentor for students, with the experience of having gone through the program herself!

After four years of hard work and commitment, the students are ready to begin college. The program guides them through the maze of financial aid, scholarship searches and applications, and college admissions so that this big step is a successful one. Mentoring and social support continues throughout the students' college careers but our relationships with the students last a lifetime!

Haley Northup,
Program Director
northuph@wmfc.org

The Dow COP students have a common goal of success to help them bond. The program works because students build the skills necessary to keep moving forward with their goals and next steps after high school, whether that be community college, university, or technical/trade school.

“Don’t wish it was easier, wish you were better. Don’t wish for less problems, wish for more skills. Don’t wish for less challenges, wish for more wisdom.” -John Rohn

Kelsey Miller,
Program Assistant
millerk@wmfc.org

I feel like this quote touches what we are all about! COP helps students prepare for those challenges and come out successful!

Dow College Opportunity Program

The mission of the Dow College Opportunity Program is to help qualified students become prepared to achieve their post-secondary goals through mentoring, cultural exposure, community volunteerism, and the development of academic and social skills

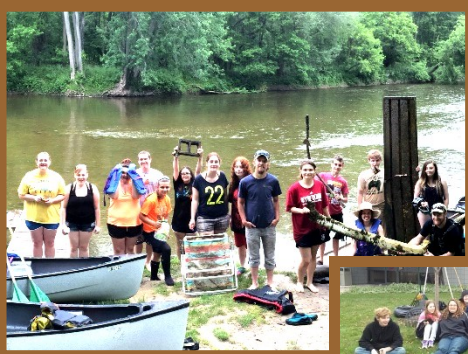

Helping each community member TODAY to reach their full potential TOMORROW

Student Experiences

Mackinac Island Service Trip—
Students help the community and explore the island!

Volunteering on a Chippewa
River cleanup and at the Arnold Center!

Dow COP gave me the support,
hope, and opportunities I needed
to succeed in my life.

-Sasha

Breanna and Sabrina learn to support
one another through difficult challenges

[On my mission trip] people kept asking me how I did
what I do and I told them it was the stuff I learned in COP
from volunteering, and being very flexible in what I did.
Then I volunteered to lead my group in devotions and
that was scary, but I couldn't have done
it without the communication skills I
learned in COP.

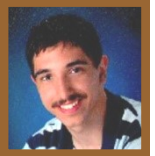

-Edwin

Students are trained in valuable skills, such as
CPR, AED, and First Aid

[Dow COP] built me a better character than
what I had before. If it wasn't for the pro-
gram, I would not be in college at
all. It helped clear out a foggy
path for me to understand.

-Pedro

"Working together to
build not only a team,
but also a family!"

When students are
empowered through
challenges, they learn
there is no limit to
what they can achieve

The Summer Adventure Experience shows students they
can overcome any obstacle!
